AGRICULTURAL CALENDAR

Compiled by the Department of Agriculture and Fisheries

This calendar of the agricultural year is a rough guide to the times of the year when various agricultural operations take place. The vagaries of the weather will, within limits, cause variations from season to season and there are also slight variations from district to district.

OCTOBER: Preparation for first rains: - "Afir" sowing of cereals commences about mid-October. Threshing and winnowing of dura, maize and sesame concludes by the beginning of month. Planting of autumn potatoes. Picking cucumbers and string beans - lifting beetroots. Transplanting of cabbage, cauliflower, kohlrabi and sowing of carrots, beetroot, early ful (beans), radish, parsley, spinach, spring onions. Transplanting of tomatoes in Jordan Valley and coastal plain. Irrigation, manuring, pruning, budding (top working) in citrus groves. Last irrigations in orchards and vineyards. Operations to prevent soil erosion caused by winter rains in orchards. Sowing green manures. Picking late grapes, olives, dates and pomegranates and early citrus fruits (lemons, grapefruit and clementines). Pickling of olives; pressing of olives for oil.

NOVEMBER: Ploughing for winter crops (provided rain has fallen by then). Sowing of winter crops (e.g. wheat, barley, oats), hay crops (vetch and oats, vetch and wheat, oats, berseem). Planting of winter potatoes commences about the middle of the month. Sowing and planting of winter vegetables, such as peas, broad beans, turnips, radish, carrots, beets, onions, garlic. Transplanting cabbages, cauliflowers; tomatoes in Jordan Valley and coastal plain. Manuring, budding in citrus groves, fruit orchards and vineyards. Sowing green manures. Preparation of land for new plantings. Manuring of vineyards. Picking early citrus fruits. Picking and oil pressing of olives.

DECEMBER: Completion of sowing of barley; continuation of sowing of wheat, oats, legumes (pulses), berseem fahli. Summer ploughing (in light soils only) commences (weather permitting). Sowing and planting of late winter vegetables e.g. radish, carrots, beets. Continue to sow spinach, peas, lettuce, turnip and transplant late cabbages. Planting of winter potatoes concludes about the 3rd week of the month. Lifting of autumn potatoes commences. Harvesting of winter vegetables. Preparation of nurseries for tomatoes, eggplants and peppers. Planting windbreaks, hedges and forest trees. Ploughing and manuring of orchards and vineyards. Pruning early varieties of grape vines and stone fruit trees. Picking citrus and olives; pressing olives for oil.

JANUARY: Completion of sowing of late wheat and legumes; commencement of summer ploughing. Preparation of land for spring potatoes. Planting potatoes, lettuce, onions. Harvesting of winter vegetables and preparation of land for spring vegetables and tobacco. Planting of deciduous trees and vines. Pruning trees and vines. Ploughing and cultivation of orchards and vineyards. Picking citrus. Picking olives (Acre sub-district).

FEBRUARY: Second ploughing for summer crops (dura, maize, sesame, melons and water melons). Preparation of land for spring potatoes and vegetables. Planting of spring potatoes commences by the end of the month. Sowing of seed beds tomatoes, eggplants, pepper, etc. Sowing of fasulya, bamia (Okra) spring cucumbers, marrows and pumpkins commences by the 3rd or 4th week of the month. Planting of fruit trees, vines and olives. Pruning and grafting deciduous trees and vines. Ploughing under green manures. Picking citrus fruits.

MARCH: Weeding of winter crops and winter vegetables. Sowing of chick-peas, melons and water melons, lubia, fasulya.

Preparation of land for dura, maize and sesame continues. Sowing of dura, maize and melons commences by the third week of the month. Lifting of autumn potatoes commences. Sowing and transplanting of spring and summer vegetables e.g. tomatoes, eggplants, peppers, cucumbers, squash, lubya, pumpkins, okra, etc. Planting of summer potatoes in irrigated area. Mowing of hay (vetch and wheat, oats, berseem) commences by 3rd or 4th week of the month. Sowing of chick peas continues and is concluded by the end of the month. Planting citrus trees, olive and banana trees. Ploughing, hoeing, weeding, opening basins and ditches for irrigation in citrus groves and irrigated orchards. Spring fertilising. Pruning and grafting of fruit trees, vines, and olives. Picking of citrus fruits.

APRIL: Completion of sowing of dura and maize. Sowing of sesame commences about mid-April. Completion of planting of potatoes. Mowing of hay continues during the first fortnight of the month. Harvest of kersennah commences about the second week of the month. Harvest of barley commences about the 4th week of the month. Harvest of horse beans commences. Sowing of cucumbers and marrows, lubya, bamia, carrots, beets continues. Transplanting of tomatoes, egg-plant, peppers, local cauliflower, etc. Planting of sweet potatoes, tomatoes, Jerusalem and globe artichokes. Sowing of ground-nuts. Irrigation and hoeing of vegetables. Transplanting of tobacco seedlings commences. Lifting of the winter potato crops, garlic. Picking globe artichokes. Planting of citrus and bananas. Ploughing, hoeing, weeding and preparing for irrigation in groves, orchards and vineyards. Picking late citrus fruits.

MAY: Harvest of barley, oats, wheat, horse beans (main crop) and peas. Hoeing and cultivation of dura, maize, melons and water melons. Hoeing and irrigation (where water is available) of summer vegetables and spring potatoes. Threshing of kersennah and barley commences. Harvesting of tomatoes, water melons, cucumbers and marrows commences. Sowing earliest cabbages. Transplanting of tobacco seedlings concludes during the first fortnight of the month. Transplanting tomatoes, eggplants and peppers. Baling of hay commences. Lifting of spring potatoes commences by the end of the month. Picking string beans, globe artichokes - lifting garlic. Latest planting of citrus. First irrigation of all fruit orchards. Cultivating and weeding; thinning of new twigs and fruits in orchards and vineyards. Spraying and dusting against pests and diseases. Picking last citrus, first apricots.

JUNE: Harvest of barley and oats concludes and that of wheat commences. Threshing of barley, oats, kersennah, horse beans commences. Baling of hay continues. Hoeing and cultivation of melons, water melons, dura, maize and sesame continues. Lifting of spring potatoes continues. Harvesting of melons, cucumbers, marrows, okra and tomatoes continues; also onions, beans. Picking of first leaves of tobacco commences. Irrigating, cultivating and weeding in citrus groves, orchards and vineyards. Spraying and dusting for pest control. Picking apricots; early grapes and plums and some local varieties of apples.

JULY: Threshing of cereal crops and legumes. Cultivation and hoeing of dura, maize and sesame. Picking and curing of tobacco leaves (second leaf). Preparation of land for autumn potatoes and vegetables. Preparation of nursery beds for autumn vegetables (cabbage, cauliflower, kohlrabi, etc.). Sowing cabbages, late cucumbers. Picking string beans, tomatoes, egg-plants, peppers. Lifting of onions commences by second or third week of the month. Lifting of summer potatoes concludes. Irrigating, cultivating, weeding in citrus groves and irrigated orchards and vineyards. Spraying and dusting for pest control. Picking grapes, plums, early pears and apples. Vintage of grapes

AUGUST:

Threshing, winnowing and cleaning of winter cereals continues. Harvesting of dura, maize and sesame continues and is concluded by the 3rd or 4th week of the month. Transplanting of cauliflower and cabbages and sowing of beets, carrots, radishes and peas commences by the 3rd or 4th week of the month. Picking and curing of tobacco leaves continues. Picking of late maturing water melons continues. Preparation of land for autumn vegetables and potatoes. Summer ploughing (where tractor power is available) for winter crops is commenced. Sowing early autumn potatoes. Lifting onions. Harvesting tomatoes, eggplants, peppers. Irrigating, cultivating and weeding in citrus groves, orchards and vineyards. Spraying and dusting late fruit varieties for pest control. Pruning in citrus groves. Picking late plums, grapes, peaches, pears and apples, early lemons and early picking olives (in warm areas).

SEPTEMBER:

Threshing, winnowing and cleaning of winter crops and summer crops continues. Transplanting of cabbage, cauliflowers, kohlrabi, lettuce and sowing of radishes, spring onions, beans, beets, carrots and turnips continues. Planting of autumn potatoes commences by the 3rd or 4th week of the month. Summer ploughing continues. Picking of tobacco on third leaf concludes by the 2nd or 3rd week of the month. Hoeing and irrigation of autumn vegetables. Lifting of ground-nuts. Harvesting earliest cabbage, beetroot, carrots. Irrigating, cultivating, weeding of citrus groves and irrigated fruit orchards. Pruning of dry citrus branches. Budding of trees in nurseries. Picking apples, quinces, late grapes, and pomegranates. Picking olives (in the south and plains) lemons and late figs. Pickling of olives.
